

Introduction

OK so first off welcome! I am super excited that you have got your hands on this cheat sheet because the information contained in this report works. Yes 100% it works because I have taken the ALL OF THE STEPS outlined below over the past few years since I began internet marketing in June 2014. The steps I am going to teach you that have allowed me to earn tens and thousands of dollars in affiliate commissions and allowed me to me to quit my full-time teaching job and live the laptop lifestyle.

IMPORTANT DISCLAIMER:

Results are not typical. I can not guarantee your success. But if you can put all the steps outlined in pdf in to action I can promise you that you will drastically increase your chances of earning a consistent passive income online.

Step 1 – Choosing a Profitable Niche

- Make Money Online Niche
- Health and Fitness
- Dating
- Gambling
- CBD Oil
- Dog & Cat Niche

The list above shows some of the most profitable niches out there currently on the internet. Even if you don't have an interest in any of niches it doesn't matter there is money to be made. Niches like the make money online niche has millions of potential customers that you can tap into and make money from if you follow exactly what I show you in this PDF. Once you learn the basics of running an online business and understand the basics of internet marketing and begin making an income from one of these niches, you can branch into sub niches that you genuinely have an interest in. My advice is to start off in the make money online niche.

Step 2-Your Online Business Must have a Strong Foundation

For your online business to stand any chance of success you will need to make sure it is built from the ground up with strong foundations. Just like a house. You will need to invest in the following things to that are vital for your online business to grow and prosper long into the future

1. Get a domain

- You will need to brand yourself with a name for your website
- E.g.- side hustle marketer
- E.g.- bare knuckle blogger
- Go to www.godaddy.com and search for your domain name and see if it's available. If it is available you can purchase it

2. Web Hosting

- You will need a web hosting company to host your domain and your website when you eventually set it up
- I use **Hudson Valley Hosting**: The have very cheap prices and very good customer support if you need help to get your web hosting set up

3. WordPress

- You will need to download WordPress to your desktop and install it through your cPanel with the web hosting platform you have chosen (E.g. Hudson Valley Hosting)
- WordPress will allow you to begin to put together a structure to your site and make it look professional

4. Page Builder

- Once you have WordPress set up on your site you can begin to set up your pages
 - There are many different page builders out there that have expensive monthly fees
- I use Optimize Press 2.0 on my website to create all my pages (e.g. blog posts, opt-in/squeeze pages, membership sites and sales pages)

5. Autoresponder

- You will need an autoresponder to store all your email leads as you begin to grow your email list
- An autoresponder also allows you to send mass broadcasts to all of your email subscribers at once
- I personally use Sendlane as my autoresponder they have very reasonable prices

6. Messenger Bot

- You will need a messenger bot platform to store all your bot leads as you begin to grow your bot list
- A messenger bot platform also allows you to send mass broadcasts to all of your bot subscribers at once
- I personally use Many Chat as my Messenger Bot Platform as they have very reasonable prices

Step 3-Growing a List

Is when people who have an interest in a specific niche (example: making money online) give you their contact details and you store those details in a database

- Example 1: a person gives you their primary email address which you save in an autoresponder which you can use to email them over and over again (this is called growing an email list)
- When You Have A List: **You Can Drive Traffic**. The more subscribers you have on your list the more 'clicks' you can send to the sales page. The more clicks you can send the more money you can make

There are two ways to grow a list whatever niche you choose

- 1. FREE Methods (YouTube, Instagram, Facebook, LinkedIn, Quora, Pinterest)
- 2. Paid Methods (Facebook Ads, Google Ads, Bing Ads)

Here is how I grew a list of over 1000 subscribers in the make money online niche using 100% FREE Facebook traffic

Step (a): Set Up a Brand-New FB Profile

Very simple set up a brand-new FB account add a picture of you as your profile picture maybe your cover photo can be your company logo or branding. Fill out all your descriptions. Add plenty of real photos of yourself, your family, friends & hobbies. I would even add a FB live introducing yourself so there is content to look at when you begin to move on to the next step

Step (b): Adding Buyer Friends

This is the secret sauce of this method & it was under your nose all along. Did you know there are hundreds of FB groups for people who have bought digital products on JvZoo & W+? When I have bought products, myself I have nearly all the time being asked to join a private mastermind group by the vendor. But did you also know you don't actually even need to be a member of these groups to see who's actually in them! Take my bareknuckle marketing live FB group - <https://www.facebook.com/groups/bareknucklemarketinglive/> in this one group I have 2,036 people who have all bought one of my courses at some point. There are other buyer groups with over 10,000 buyers just sitting there waiting for your friend request and that's what you need to do next get adding

Step (c): Reach the 1000 buyer friend mark ASAP

FB allows you to send out a maximum of 1,000 friend requests. Use my FB group as your starting point. Add 1,000 people from my group. Wait a week see how many accept (not all will) after that week is up go back and cancel the pending requests of the buyers who did not accept and free up another 1000 slots. Then find a different buyer group with 1,000 plus

members and add another thousand people from that group. Keep repeating the process until you at least have 1,000 buyer friends on your new FB profile. Realistically it will take at least 3-4 weeks before you hit the 1000 mark. But by all means prove me wrong I would be delighted if you did 😊

*Important – NEVER accept friend requests, your main goal is to add buyers from buyer Fb groups. If you start accepting random friend requests from people you will have no knowledge if they are buyers or not. At least if you are only sending FB requests to known buyers you find in these buyer FB groups you a 99% guaranteed that your growing friend list is extremely targeted

Step (d): Begin to get to know your Buyer Friends

Share content on your profile. Post funny memes, motivational quotes, family events. Comment on your buyer friend's posts, like their posts wish them a happy birthday. This might seem a bit odd but the golden rule in internet marketing is 'people buy from who they like know and trust'. If you consistently do this on a regular basis your growing buyer friends list will return the favour when you begin to market to them and promote affiliate offers. This is a crucial step & something which I did invest a lot of time in & thankfully it literally has 'paid' off. You will get regular buyer friends who will always support you & begin to consistently engage with your posts

Step (e): Generating FREE Buyer Traffic

So, you need to create a free gift for your potential leads. Create a free training or pdf on a topic you have an interest in in the Make money online niche. Also set up a opt in page

where you offer some personal bonuses you have created or some PLR documents that you have acquired to give people an incentive you opt into your list. Similar to what I did by offering you this report. Once you have done all that you can begin making posts on your FB profile that your buyer friends are going to see on their timelines. FB give way more priority to posts coming from your FB profile and is going to have way more organic reach than your FB fan page or FB group

You can look at my FB profile & study the different types of posts I use

- FB lives
- GIF Animation
- Funny Memes
- PowerPoint Cover Slides
- Short 1-minute videos that play on loop

All of these posts have a small bit of information about the product am promoting with a call to action. Asking people to use a buzzword to type into the comment section. As your buyer friend numbers grow so will the amount of comments you will get on your posts.

Step 6: Growing a list from Free Buyer Traffic

When people begin to comment on your posts. Like their comments and reply back to them saying you will be in touch again with a private message via FB messenger with all the details. Only ever send link to those who actually comment on your posts. If you spam people they will report you, block you and you run a high chance of getting your FB profile shut down. Drop people a private message with a link to you opt in page showing all the

value your prospect will get if they give you their contact details. Keep growing your buyer friend list and follow all the steps outlined and you will have a big list for FREE in no time.

Step 5: Start Making Money from Affiliate Marketing

Affiliate marketing is the easiest and one of the fastest ways to make money online

- Affiliate marketing is when you promote someone else's product or service, and in exchange, you get a slice of any sales.
- Someone else has done the legwork, and you are acting as a marketer on their behalf.
- The downside here is that literally EVERYONE is doing it if there is money to be made.
- Distinguishing yourself and standing out is a major battle

Where Can Apply to Be an Affiliate to Promote A Digital Products?

- Go to this Website www.muncheye.com you will find a list of digital products being sold each day on various platforms such as W+, JvZoo and Click Bank

How to Get Approved to Promote A Digital Product as an Affiliate?

- This is the most difficult & frustrating aspect of affiliate marketing when you first start off
- Newbies have no reputation or standing in the IM community
- Their requests to promote high converting offers are usually declined

- New affiliates who do get approved often set to delayed payments & have to wait a number of weeks to get paid
- This can lead to many people giving up and not continue to work at growing their business with affiliate marketing
- I highly encourage you to make a very short 1-2-minute video and upload it on to YouTube (make it unlisted) & send it to the vendor whose product you are interested in promoting
- Introduce yourself (who you are where you're from)
- Let them know you are interested in promoting their product and have applied for your affiliate link (mention what your W+ or JvZoo username is)
- Just be upfront and honest about your experience and say how big your list is & explain briefly how you will promote the product

How to Promote the Affiliate Offer to Your List?

- When you get approved to promote a digital product you also need to complete the following steps to maximize your sales and make more money
- 1. Do a video review of the product talk about its strengths and weaknesses
- 2. Create a bonus page offering an overview of the product (how much it is? Are there any upgrades?) and also some free gifts to give them an incentive to buy through your link

'Cowards Never Start, The Weak Never Finish, The Strong Never Quit'

The banner has a dark blue, starry background with a red dashed border. At the top, the text "Get Started For Just \$1" is written in large, bold, yellow letters. On the left, a cartoon superhero character with a yellow helmet, red mask, blue suit, and red cape is flying. Below the superhero is a white speech bubble with red starburst patterns containing the text "CLICK HERE!" in green, bold, outlined letters. In the center is a realistic image of a US one-dollar bill. To the right of the bill is a yellow arrow pointing left towards the "CLICK HERE!" text. Below the arrow, the text "VIP BOT" is written in large yellow letters, and "AFFILIATE CLUB" is written in white letters on a red rounded rectangular background. A smaller version of the superhero character is positioned at the bottom right corner.
